

Min-Height

Block Level Elements

Content in a paragraph : height: 100% / min-height: 50px

A large, solid dark gray rectangular block that occupies most of the lower half of the page. It is positioned directly below the text 'Content in a paragraph : height: 100% / min-height: 50px'. The block's height is determined by the 'min-height: 50px' property, as it is taller than the content height, ensuring it is at least 50 pixels high. This visualizes how the 'min-height' property guarantees a minimum vertical space for a block-level element.

Content in a paragraph : height: 100% / min-height: 8em

Content in a paragraph : height: 100% / min-height: 50%

Elements Nested

Example#1 : Containing element : height: 100px. Content in a paragraph : min-height: 70%

A large, solid dark gray rectangle occupies the majority of the page, representing the content area for Example#1. It is positioned directly below the text description of Example#1 and above the text description of Example#2.

Example#2 : Containing element : height: 100%. Content in a paragraph : height: auto
