

The `grid-template-rows` Property

Use the *grid-template-rows* property to define the size of the rows in a grid layout.

The first row in this grid is 100px high, and the second row is 300px high:

The `grid-template-columns` Property

Use the *grid-template-columns* property to define the number of columns in the grid layout.

This grid layout has four columns:
