

# The font-size-adjust Property

**Note:** Only Firefox supports the font-size-adjust property.

## Two divs with the same font-size-adjust property:

You control the font size better with the font-size-adjust property.  
You control the font size better with the font-size-adjust property.

## Two divs without the font-size-adjust property:

You control the font size better with the font-size-adjust property.  
You control the font size better with the font-size-adjust property.
