

position: absolute;

An element with `position: absolute;` is positioned relative to the nearest positioned ancestor (instead of positioned relative to the viewport, like `fixed`):

This div element has `position: relative;`

A diagram illustrating the relationship between a relative container and an absolute child. A large light blue rectangle represents the container with the text "This div element has position: relative;". Inside the bottom right corner of this rectangle is a smaller light blue rectangle representing the child element with the text "This div element has position: absolute;". The absolute child is positioned relative to the container, not the viewport.

This div element has
`position: absolute;`
