

# Min-Height

## Block Level Elements

Content in a paragraph : height: 100% / min-height: 50px

A large, solid dark gray rectangular block that fills most of the page below the text. It represents a paragraph element with a minimum height of 50 pixels, demonstrating how the min-height property works when the content is short.

Content in a paragraph : height: 100% / min-height: 8em

Content in a paragraph : height: 100% / min-height: 50%

## Elements Nested

Example#1 : Containing element : height: 100px. Content in a paragraph : min-height: 70%

A large, solid dark gray rectangle occupies the majority of the page below the first text block. It represents the visual output of the CSS example where a containing element with a fixed height of 100px contains a paragraph with a minimum height of 70%. The paragraph content is not visible, but the rectangle's height is determined by the minimum height constraint.

Example#2 : Containing element : height: 100%. Content in a paragraph : height: auto
